Physicochemistry of Carbon Materials

Toruń, 11.07.2014.

CERTIFICATE

I confirm that the computer game „Professor WHY - Chemistry” is the original product produced by CTAdventure.com.

In my opinion this game is excellent educational material for young people aged around 14 (secondary school). This is really interesting game, the major character Professor Why is really kind person, who in simple and interesting way introduces players into the world of chemistry. The interface of this game is also really interesting, and this is why the game can be played not only in school but also at home. The game is still developed and the owner can download extensions on line. It is also important that the game is compatible with the OS system and can played on iPads and iPhones. In my opinion there are no essential errors in the game.

A handwritten signature in black ink, appearing to be 'AT' followed by a long horizontal line ending in a small hook.

Prof. dr hab. Artur P. Terzyk

Head of Physicochemistry of Carbon Materials Research Group
